International Pharmaceutical Abstracts (IPA)

Worldwide, comprehensive bibliographic coverage of pharmaceutical science and health related literature

Source: Thomson Scientific, Inc.

Produced in co-operation with the American Society of Health-System Pharmacists International Pharmaceutical Abstracts includes 30 years of in-depth indexed reference to the world pharmacy (in the broadest sense) literature; plus, related health, medical, cosmetic journals, and state pharmacy journals; abstracts of presentations at major pharmacy meetings are also included. IPA is unique in its coverage—no other service provides this. The numerous references to alternative and herbal medicine (over 10,000 references) are an example of this unique coverage.
